

GUILHERME MIRANDA ROSSATO

Porto Alegre, Rio Grande do Sul, Brasil

SOFTWARE ENGINEER

PROFESSIONAL PROFILE

Full-stack developer experienced with modern web technologies (Nodejs, Nextjs, Typescript, PHP); Capable frontend developer (React, Redux, TailwindCSS); Skilled with cloud infrastructure, server management, and data engineering (including data storage and related services).

WORK EXPERIENCE

Software Engineer BetterBrain | 2024 - 2025

Collaborated within a multidisciplinary team to develop a SaaS app focused in the health sector. Software development in the backend using SQL, TypeScript, Next.js, and Deno. Active development of unit tests (Cypress) and end-to-end tests (Playright); Monitoring of logs and proactive communication with the QA team to deliver reliable and high-quality features to the project with minimal overhead.

Full Stack Engineer Traact | 2023

Web app development using a modern web tech stack (Node.js, Nest.js, Nextjs, Docker, SQL), sophisticated CI/CD processes, automated testing and various integrations with cloud services for all sort of data loading, transformation, refining, filtering, etc. Worked in an Agile methodology in fixed development cycles with clear weekly goals and daily meetings with a multi-disciplinary team.

Software Engineer Flomatika | 2021 - 2023

Full stack web development with Node.js, PostgreSQL, MongoDB, and creation of both unit tests and end-to-end-tests. Developed with multiple integrations with AWS services (Lambda, S3, Cloud Watch, Secrets Manager, etc). Implementation of state management and designs from Figma on the frontend with React (with Typescript).

EDUCATION

Computer Engineering

Pontifical Catholic University of Rio Grande do Sul

English Course

That's All - School of English
